

Total Defence in Sweden:

Research aim and scope

This project seeks to enhance our understanding and develop innovative responses to the challenges faced by Sweden's Total Defence. The project will mainly focus on collaborative practices between key stakeholders in the West of Sweden regarding sustainable crisis management and societal planning.

Research activities

- Key stakeholders will actively participate in research activities, including collaborative public management modelling, policymaking analysis, interviews, surveys, and co-creation workshops.

Deliverables

- Thesis project work on Total Defence (undergraduate and postgraduate)
- Research articles
- Policy briefs based on research results

Partner organisations: Combitech
